

ALIJA HODŽIĆ

Junior Full-Stack Developer

PROFILE

Software Development student in Mostar and full-stack developer comfortable across Angular on the front end and ASP.NET Core (C#) on the back end. Contributed as an intern to an existing marketplace product within a small agile team, and independently built full-stack side projects end-to-end — from relational data modeling and REST APIs through authentication and deployment. Seeking a full-stack internship to contribute reliable features across the stack within a collaborative engineering team.

EXPERIENCE

Full-Stack Development Intern

Nov 2025 – Apr 2026

HAA Marketplace

- Developed and maintained responsive frontend features in Angular and TypeScript within an existing marketplace product.
- Built and integrated RESTful APIs with ASP.NET Core and C# to extend the product's backend services.
- Implemented authentication and account-related backend functionality supporting user access to the platform.
- Modeled structured relational data with MySQL and Entity Framework Core to support core product features.
- Collaborated within a small agile engineering team, contributing to testing, debugging, and deployment.

PROJECTS

FreelanceHub

[Live](#) ↗ · [Code](#) ↗

Solo-built freelance marketplace web application, developed end-to-end from scratch

Angular · ASP.NET Core Web API · C# · Tailwind CSS · SQLite · Entity Framework Core · JWT · Git

- Independently designed and built a freelance marketplace from scratch, owning the full stack with an Angular front end and an ASP.NET Core Web API.
- Developed the core feature set — messaging, reviews, and notifications — enabling end-to-end interaction between users.
- Implemented JWT authentication with role-based dashboards to control access by user role.
- Built a responsive interface with Tailwind CSS backed by REST APIs.
- Persisted data with SQLite and Entity Framework Core, and managed deployment independently.

MeniSpot

[Live](#) ↗ · [Code](#) ↗

Digital QR menu SaaS platform for restaurants, cafes, and bars

Angular · TypeScript · ASP.NET Core · PostgreSQL · Docker · Cloudflare · Caddy

- Built admin and restaurant-owner dashboards in Angular and TypeScript on top of an ASP.NET Core API backed by PostgreSQL.
- Developed the QR digital menu structure with subscription and license management, image uploads, customizable themes, and usage analytics.
- Deployed the platform with Docker on a VPS, using Cloudflare and Caddy.

Portfolio

[Live](#) ↗ · [Code](#) ↗

Personal developer portfolio, built and deployed online

HTML · CSS · Responsive Design

- Designed, built, and deployed a responsive personal developer portfolio to showcase projects and technical skills online.

TECHNICAL SKILLS

Frontend

Angular · TypeScript · HTML · CSS

Tailwind CSS · Responsive Design

Backend

C# · ASP.NET Core · Entity Framework Core

JWT Authentication · REST APIs

Databases

PostgreSQL · MySQL · SQLite

Tools & DevOps

Git · GitHub · Docker · Cloudflare · Caddy

Vercel · Render

Concepts

Role-based access control · REST API design

Component-based architecture · Agile teamwork

EDUCATION

University "Džemal Bijedić" in Mostar

Faculty of Information Technologies

Software Development

2022 – Present

LANGUAGES

Bosnian

Native

English

B2 (Upper-Intermediate)
