- English

ALIJA HODŽIĆ

Junior Full-Stack Developer

About Me

Junior full-stack developer focused on building modern web applications with Angular, TypeScript, ASP.NET Core, and PostgreSQL. Experienced in developing dashboards, REST APIs, authentication flows, responsive interfaces, and production deployments. Comfortable working across frontend, backend, databases, and deployment workflows.

Experience

Full-Stack Development Intern — HAA Marketplace Nov 2025 – Apr 2026

- Developed and maintained responsive frontend features using Angular and TypeScript
- Built and integrated RESTful APIs using ASP.NET Core and C#
- Worked with MySQL, Entity Framework Core, and structured database models
- Implemented authentication and user-related backend functionality
- Participated in testing, debugging, and deployment workflows
- Collaborated within a small agile engineering team

Projects

FreelanceHub

- Built a freelance marketplace platform with Angular and ASP.NET Core Web API
- Implemented JWT authentication, role-based dashboards, messaging, reviews, and notifications
- Developed responsive UI with Tailwind CSS and integrated REST API workflows
- Worked with SQLite, Entity Framework Core, deployment workflows, and version control

MeniSpot — Digital QR Menu SaaS Platform

- Built and deployed a QR menu SaaS platform for restaurants, cafes, and bars
- Developed admin and restaurant owner dashboards using Angular, TypeScript, ASP.NET Core, and PostgreSQL
- Implemented QR menu structure, subscription/license management, image uploads, themes, and analytics
- Deployed with Docker on a VPS using PostgreSQL, Cloudflare, and Caddy

Portfolio

- Personal developer portfolio showcasing selected projects, skills, and contact information
- Built as a responsive web application and deployed online
